Silver Spring, MD 20910-3283

REPORT FOR:

MONTH

**August**

YEAR

**1997**

SIGNATURE

**Amy McCullough**

In Charge of HSA

DATE

**September 9, 1997**

*When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts, and hydrologic products issued (WSOM E-41).*

☒ No flood stages were reached in this HSA for the month above.

The San Angelo HSA received slightly above normal rainfall over much of the area for the month of August. Scattered thunderstorms during the month required the issuance of a few Urban and Small Stream Advisories and 2 flash flood warnings, but no river flooding occurred and no flash flooding was reported. The most widespread rainfall occurred on August 7<sup>th</sup> as an early cold front moved across the area. Many places received an inch or more of rain.

For the month of August, San Angelo received 2.76 inches of rain, which is 0.83 inches above normal. The yearly total is now 18.86 inches, which is 6.09 inches above normal. Abilene received 4.16 inches of rain, 1.36 inches above normal. For the year, Abilene remains 4.17 inches above normal, with 20.34 inches total rainfall.

Reservoirs in the HSA remain below conservation levels and the threat of river flooding is low.
